

CRAFT L

Configurations & possibilities

1. Customize with shelves

6 shelves possible Between each shelf is 9cm space

Standard: 1x shelf

It is possible to get more shelves.

2. Front lid: Gasspring and lock

Lock without key:

The lock can be unlocked by moving the cover a little bit.

After moving the cover a little bit there is a hole on the back of the tube. There can be the lock unlocked with your finger.

It principal is little the same like a lock on a bonnet of a car.

3. Cover

Important:

This is the main handle for opening cover

Workbanch:

The top is covered with rubber for protection while using it as workbanch.

Max. weight on top: 25kg

4x Strap handles

(there are special straps with urban arrow on it available. If this is for sale available you need to ask).

4. Create bigger compartment

With separation wall

Without separation wall

5. IDEA for separation front case

Attention! This shelf is not standard available but possible.

Without shelve in front case

With shelve in front case

6. IDEA for tool drawers

Attention! This tool drawer is not standard but possible.

The CRAFT is design with an option for ALUCA compartments.

Tool configurations like ALUCA offers a lot of organize possibilities with drawers or without.

ALUCA is an compartment which are normally build in vans. (see picture below).

For more information:
www.amsterdam-inbouw.nl

7. Space for Eurocrate

There is space for 3 eurocrates.

Dimensions eurocrate: 600x400x200mm

8. Raised edge

The CRAFT got raised edges. This will provide that the cargo inside the box will not move against the sliding door. The door is now with the raised door always free for sliding forward and back.

9. Special Wings for reducing impact on rail

The CRAFT got special wings mounted on the CARGO frame. The wings are sticking out. This will reduce the impact on the sliding rail and mechanism.
